

For Your Safety,

PLEASE DO NOT USE SHARED APPLIANCES UNTIL FURTHER NOTICE

*Together, we can help stop the
spread of **COVID-19***

Refraining from using shared appliances – like coffee makers, ice machines, and microwaves – helps stop the spread of germs and viruses.

A facility's kitchen area, breakrooms, and appliances are some of the most high-traffic areas and high-touch points. Although the virus that causes COVID-19 is thought to spread mainly from person to person (mainly through respiratory droplets produced when an infected person coughs or sneezes), it is also possible for a healthy person to pick up the virus from an infected person touching the same surface, and then rubbing their eyes, nose, or mouth.

Building | Maintenance | Solutions

Everyday ways you can help prevent COVID-19:

- Wash your hands often
- Wear a face mask when around others
- Cover coughs and sneezes with a tissue or inside of elbow
- Clean and disinfect frequently touched surfaces
